Rainer James Palmiano

Quezon City, Philippines | +639478015830 | rbpalmiano@gmail.com | linkedin.com/in/rainer-james-palmiano-7972a2250

Data Analyst | Electrical Engineer | Lifelong Learner

Professional Summary

Electrical Engineer transitioning into **AI/Data** with strong, proven track record leading **energy analytics, operational efficiency programs, and project delivery**. Built an energy management program from zero, reduced energy utilization to **75% of baseline**, and delivered **~₱13M/year** in electricity + fuel savings through data-driven prioritization and execution. Comfortable bridging **engineering + analytics + automation**, with training across **LLM engineering, RAG, agentic workflows, and data science**.

Key Skills

Agentic AI | LLM Engineering | RAG Systems | Workflow Automation | AI Integrations | LLM APIs | OpenAI SDK | Hugging Face | LangGraph/AutoGen | MCP
LoRA/QLoRA Fine-tuning | Vector Databases | LLM Evaluation | Guardrails & Safety | n8n | Webhooks | REST APIs | ElevenLabs | GoHighLevel | Git/GitHub
AWS Bedrock | Amazon SageMaker | AWS Lambda | App Runner | Docker | FastAPI | MLOps | Python | Machine Learning | Deep Learning | Model Evaluation
Feature Engineering | SQL (MySQL) | Data Wrangling | Data Visualization | Tableau | Power BI | Electrical System Design | AutoCAD | Revit | ETAP | MATLAB
Dialux | Planswift

Education & Training

Proficient AI Engineer, *Ed Donner, Ligency*

- **Relevant Courses:**
  - **AI Engineer: Core Track:** LLM Engineering, RAG, QLoRA, Agents
  - **AI Engineer: Agentic Track:** The Complete Agent & MCP Course
  - **AI Engineer: Production Track:** MLOps, Deploy LLMs & Agents at Scale
  - **AI Builder:** Create Agents, Voice Agents & Automations in n8n
  - **AI Leader:** Generative AI & Agentic AI for Leaders & Founders
  - **AI Coder:** Vibe Coder to Agentic Engineer

Data Science Bootcamp, *365 careers*

- **Relevant Courses:** Probability and Statistics, Machine Learning with Python, GPT for Data Science, Linear Algebra Fundamentals, Deep Learning with TensorFlow, Software Integrations
- **Capstone Projects:**
  - (rephrase this) [Absentism project, let this be a holder first] Data pre-processing, EDA, Regression & K-means clustering, testing model and analyzing with tableau of a large database with employee attendance and other information.
  - (rephrase this) [TensorFlow project MNIST, let this be a holder first]

Bachelor of Science in Electrical Engineering, Summa Cum Laude, *University of the Philippines Diliman*
Certified Energy Manager, *Meralco Power Academy*
Certified Lean Six Sigma Green Belt, *Advanced Innovation Group Pro Excellence (AIGPE)*

Projects

- **Digital AI Twin:** LLM, RAG, AWS Bedrock
- **Personal AI Assistant:** Built an AI assistant leveraging LangGraph for dynamic workflows, integrating web scraping, file management, Python execution, and automated response evaluation to meet user-defined success criteria.
- **Price Deal Agent:** Trained a model using QLoRA fine-tuning and integrated it with an ensemble of agents utilizing OpenAI SDK framework to estimate prices, identify high-value deals, and leverage a RAG pipeline for efficient deal retrieval and memory persistence.
- **Stock Exchange Trader Sim:** OpenAI SDK, MCP Tools,
- **Product Expert Voice Agent:** [will provide future details, for now assume what I built with the following keywords] ElevenLabs, n8n,
- **AI Automated Business:** [will provide future details, for now assume what I built with the following keywords] business automated using n8n
- **AI Healthcare SaaS App:** [will provide future details, for now assume what I built with the following keywords]
- **Multi-Agent Financial AI System:** [will provide future details, for now assume what I built with the following keywords] AI business solutions with AWS MLOps

Professional Experience

Energy Manager, Universal Robina Corporation, *Pasig, Philippines* | Apr 2023 – Feb 2026

- **Built and launched the plant's energy management program from zero** (baselines, SEU registry, EnPIs, M&V, governance cadence), reducing overall **EUR to 75%** of baseline and delivering **~₱13M/year electricity + fuel savings** through prioritized energy efficiency & conservation measures.
- **Implemented an end-to-end energy data + reporting system** (submetering + consolidated electricity/fuel/production datasets + dashboards), improving loss visibility and cutting unallocated/unknown consumption by **50%**.
- **Developed normalized SEC/EnPI regression models** to isolate efficiency gains from production/ambient variability, increasing credibility of savings validation and accelerating project prioritization; supported **₱20M** worth of approved initiatives.

- **Executed a high-impact EECM portfolio across electrical/thermal utilities** (peak demand optimization, boiler/steam tuning, compressed air leak & pressure control, VFD + process setpoint optimization), **reduced max demand, improved boiler efficiency, lowered compressor energy**.
- **Institutionalized continuous energy improvement** through a structured project pipeline, ROI tracking, and operational SOPs/training; improved compliance from **5% → 80%** and ensured long-term sustainment of energy savings across departments.

Project Manager, Universal Robina Corporation*, Pasig, Philippines* | Feb 2025 – Feb 2026

- **Led end-to-end delivery (planning → design coordination → execution → turnover)** of a 10 TPH industrial plant, completing **3 months ahead** of schedule and achieving **100%** milestone on-time completion, while maintaining **±5%** budget variance and **zero** critical punch-list items at handover.
- **Implemented an AI-automated project tracking and reporting system** (progress capture, follow-ups, dashboards, auto-reminders), significantly reducing manual reporting time, improving forecast accuracy, and cutting decision turnaround time from **7 days** to **1 day**.
- **Applied Lean Six Sigma techniques to streamline project workflows** (RFI/submittal cycles, approvals, handoffs), reducing RFI turnaround time by **60%** and submittal approval cycle time by **50%**.

Design Engineer, Universal Robina Corporation*, Pasig, Philippines* | Oct 2022 – Feb 2025

- **Spearheaded the design and implementation of electrical systems for 5 major plants**, resulting in a **35%** increase in business production capacity, and delivered over **120 designs for a diverse range of projects**, including distribution substations, industrial/commercial establishments, and plant automation systems.
- **Developed and standardized comprehensive design guidelines** for substations, power distribution, and light current systems, eliminating non-compliance issues and ensuring **100%** adherence to regulatory standards for all newly constructed facilities.
- **Introduced innovative optimizations and a structured design workflow**, including the creation of reusable templates, blocks, and design processes, cutting design turnaround time by **30%** and **boosting overall team productivity**.
